# Total Launcher Setup Downloads

## □ DOWNLOADABLE SUBMISSION GUIDELINES

- To keep this repository secure, optimized, and easy to use, all theme and layout submissions must strictly adhere to the following rules:

### □ 1. EXPORT FORMAT

- All Total Launcher themes must be packaged and uploaded in standard '.zip' exported backup formats.

### □ 2. ANTI-PIRACY & SOURCE RESTRICTION

- If the setup utilizes non-native apps (third-party widgets, icon packs, or extension utilities), it must include a text list of those apps in the distribution archive or as an enabled object titled 'Instructions' on the setup's home page.
- All referenced apps MUST be sourced exclusively from the official Google Play Store. Links to third-party APK mirrors or modified/pirated software are strictly forbidden and will be deleted instantly.

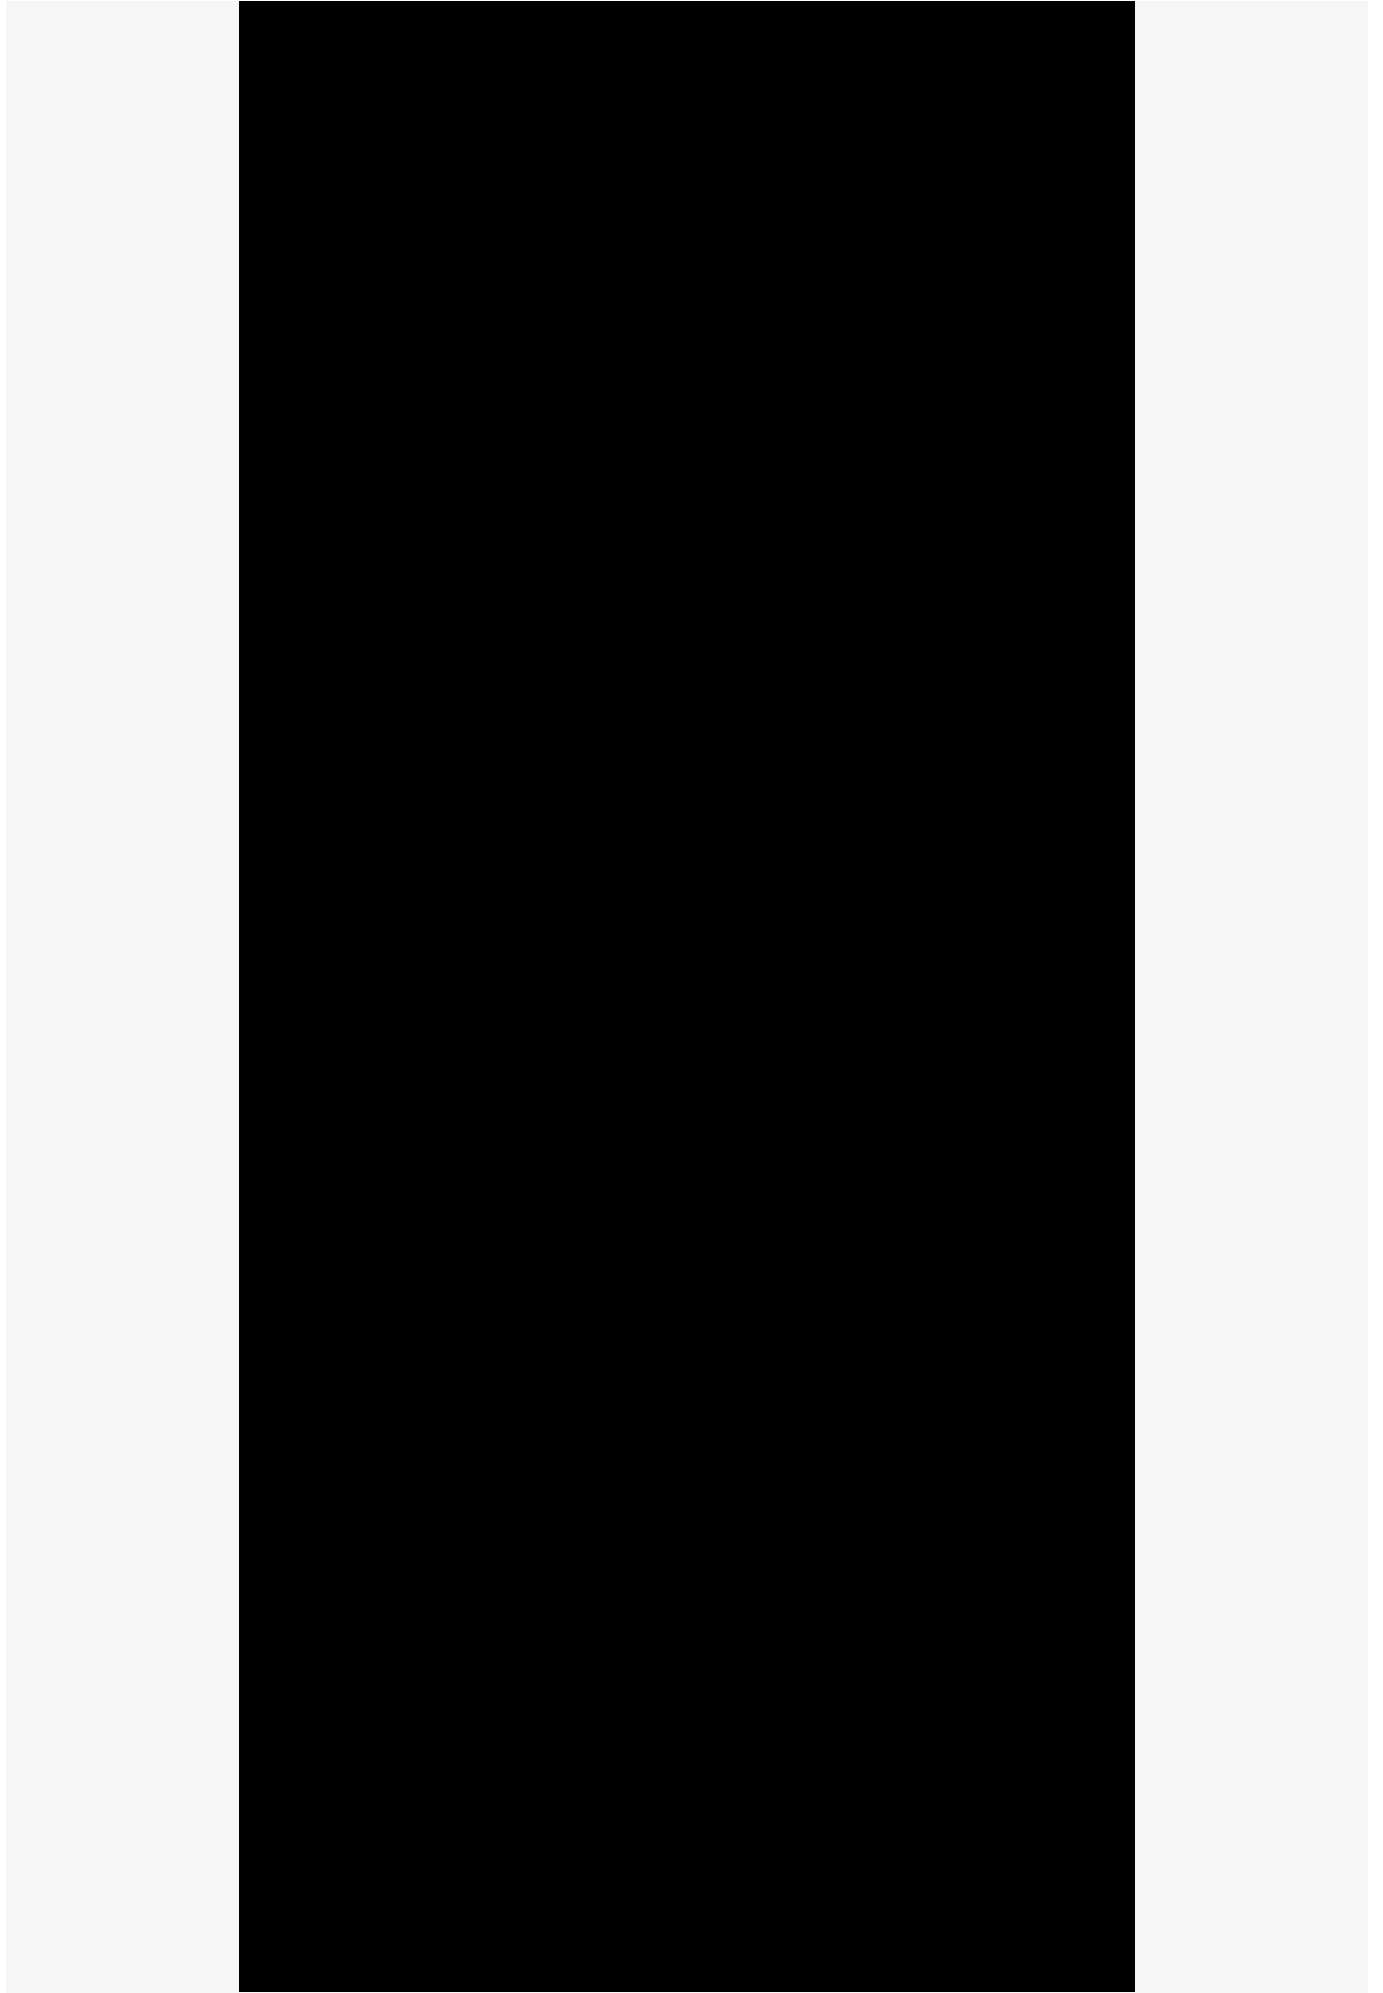

### □ 3. DEVICE COMPATIBILITY WARNING

- Android skins and aspect ratios vary wildly by manufacturer.
- Please specify what device the setup was built on (e.g., Pixel, Samsung, etc.).
- Keep in mind that heavy system variations (such as Xiaomi/HyperOS background restriction environments) do not always play nicely with complex automation scripts or rendering geometries.

Tip for Downloaders: Always check the setup developer's app list before applying a backup to ensure your device supports the configuration!

### Clean Slate

“Clean Slate” contains nothing. It is for developers. At 25kb in size the only extra baggage is native dynamic images.
